

JAVELIN TABLE BASE

Product Specification

The Javelin Table base is a classic design which has been around for a long time. With the javelin, we have reinforced certain components to ensure that the table is fit for use in a commercial environment.

- Delivered Flat Pack. 5 minutes to assemble.
- Internal leg bracket reinforced.
- Screw adjustable feet
- Custom made sizes.

BUILT FOR STRENGTH AND DURABILITY

Custom Made Corner Brackets

There are many corner brackets available commercially. Unfortunately, they are made for the DIY market only. We designed and made our own corner brackets. They are made from 3mm thick steel plate and coated with a black rust inhibiting paint so that they will not corrode.

Laminated Legs

Most corner legs are made from one-piece solid timber. As timber is sensitive to moisture, it will continually move or crack. With our legs we laminated 2 pieces of solid timber together. This ensures that the legs remain straight.

Lag Screws Embedded with Epoxy

To attach the leg to the corner bracket, we did not use standard lag bolts or screws. Lag screws tend to split the wood and pull out with little force. We have epoxied our lag screws into place with a reinforcing plate. This way we can guarantee will that they never will pull out.

Table Adjusters Reinforced

Normal practice is to insert a threaded insert (Skein nut) into the timber, to which the adjuster is screwed into. Skein nuts do not work well when screwed into end grain. To solve this problem, we epoxy our Skein nuts into place. They will not fall out.

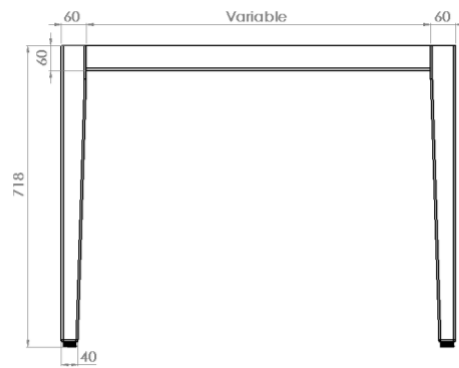

CUSTOMISE YOUR BASE

Length and Width

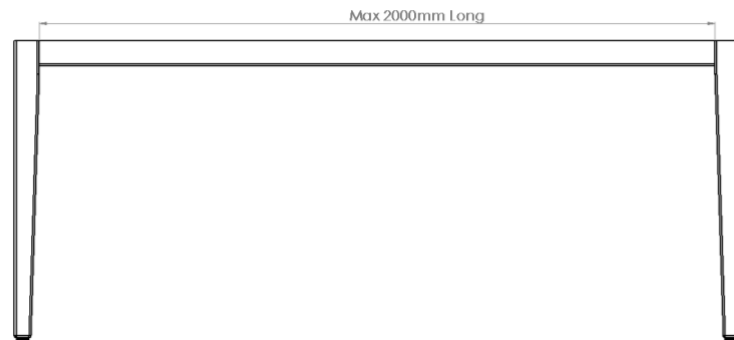

The Javelin Base comes in length increments from 700-2000mm, and the width from 700-1200mm. The length and width depends on timber type selected for your javelin table base. Call us to discuss your requirements

Table height

Our table bases standard heights are 715-718mm without a table top. In certain applications, such as aged care, we can increase the height for better wheelchair access. To adjust height of legs we require minimum order quantities.

Javelin Table base size options

WOOD TYPES

We have a selection of timbers, varying in colour and strength.

- Vic ASH or Tasmanian Oak
- NSW Blackbutt
- Recycle Jarrah
- NZ Radiata Pine.
- We can on request supply bases made from American white Oak or American Black Walnut

WOOD FINSHES AND STAINS

We finish our timber products with a commercial grade 2 pack Polyurethane finish. A Satin Finish which is a 25% gloss level.

We can stain to various colours. Please contact us for more information.

AUSTRALIAN MADE

All our products are 100% Australian made.
